

DEVCOIN

WHITEPAPER

1 Introduction

As humans, we are usually the first time exposed to the economy of barter between families with one another and Tight knitted community: goods and services are provided without an explicit agreement for Direct or future rewards, but the exchange of love, goodness, and self -confidence. As

The circle of relationships enlarges this mutual trust weakens, but the desire and willingness to Cooperate is not reduced: This is the time for economic needs to exchange. [Hayek Money: Cryptocurrency Price Stability Solution] Cryptocurrency is a digital asset and Became popular after the success of various crypto tokens in the market. The main The technology behind the development and success of cryptocurrency is blockchain technology. This modern technology works on the principle of decentralization. This provides better security, Anonymous security, and privacy. This reduces business risk and allows transparency with the main features decentralization.

1.1 Blockchain

Infrastructure blockchain technology can improve important basic services Traditional finance and potentially a foundation for decentralized businesses Model, empower entrepreneurs and innovators with all the right tools. By using Infrastructure without trust and distribution, blockchain technology optimizes transactional costs and allows the emergence of decentralization, innovative, operating, without limits and anonymous Applications that facilitate open access and encourage innovation without permission. [Bitcoin: Peer-to-Peer Electronic Cash System (2009)].

Binance Smart Chain (BSC) is a blockchain developed as a means to utilize solidity -based smart contracts with a much greater speed and the efficiency of other competitive chains. With decentralized exchanges on BSC supply Swap fast lightning and very low costs, BSC has begun to be one of the most extensive Blockchain used for decentralized finance (Defi). BSC uses a token protocol developed by The Binance team called BEP-20.

Binance Smart Chain is unique for several reasons:

- This is a sovereign blockchain, which will provide security and safety for all users and developers.
- Original dual chain interoperability will allow cross-chain and high scaling communication

DAPP Performance that requires a fast and smooth user experience

- This is compatible with EVM and will support all existing Ethereum tools together and cheaper transactions.
- Chain governance with evidence of the consensus of the authority transported, built on 21 validators Transaction validation, will provide decentralization and enable a significant community involvement.

2 What is Devcoin?

"When you make a digital payment using your original identity, it will be very easy for your identity to be counted or stolen by others, especially those who often use digital currencies as payments for application developers or a programmer"

The beginning of the creation of Devcoin is a complaint among developers and programmers, when we carry out anonymous or confidential transactions, our identity will also be revealed, so that this coin is developed for development needs, this token is in the BEP20 network This community aims to build itself as the biggest chain token smart our goal is to build a strong and global system

Don't be greedy, we need all the support from the existing community.

2.1 tokenomic

Devcoin is a token that has a non -elastic supply, which means that for each transaction

Made, the offer is reduced to add value to the asset. To ensure a fair distribution, we have decided

To charge a 5% transaction fee and a sales transaction fee of 5%. We give 60% to the first holder and 10% for the marketing and development team.

- Total supply: 27,052,000
- 60% of the first holder
- 30% AIRDROP & PRESALE
- 10% of the team's wallet

Dev Dev: 0xe60F07F1Ae07B40BED5C5EBD574E73A8AD949CD4

Marketing Wallet: 0x7D7F6EBB4BD130Ab555D7E30230D57B73A82A40E

- 5% tax costs & liquidity costs 5%.

3 Communities

Our main goal is to build a strong community, where people from all over the world can exchange experiences and debates of interesting problems, using Devcoin as a utility token. If a community is well maintained and continues to be expanded, this can produce a trustworthy relationship between the target and Devcoin group, which can put the foundation for loyal and stable repeat the user.

3.1 Protection of Dam Damage

We have designed a wallet for damage protection mechanisms where people from the community can donate anything above \$ 750 at BNB (BEP20) to make protection stronger, so there is no whale that can defeat our protection, members will be able to see all transactions on the blockchain occur in the Wallet Protection Damage DIP.

3.2 Warnings

DEVCOIN token is pure for anonymous payments, and for investment. Before buying Devcoin token, you must ensure that the nature, complexity, and risks inherent in the cryptocurrency trading are suitable for your purpose in considering that you are the state and financial position. Token will affect market prices, including, but not limited to, national and international economics, finance, regulations, politics, military, and other events, harm or positive

News events and publicity, and market conditions that are generally extreme, uncertain, and easily changed.
